CONNECT DEVICE TO WIFI

The fingerprint device tries to auto connect to the last connected WIFI if that WIFI is available. Failure to locate this WIFI, users can follow these guide to connect to a new WIFI.

STEP 1: Turn on fingerprint device. If the screen displayed is the same shown above, you need to connect the device to an available network which is connected to the internet using the device's inbuilt WIFI compatibility.

STEP 2: Locate "Fingerprint" on list of available WIFI on any smart device (mobile, laptop or desktop), connect to the "Fingerprint" WIFI using the password assigned to the fingerprint device (request for the password from the manufacturer or the super admin).

STEP 4: Select the WIFI of choice and provide its password and click on "Save"

Saving Credentials
Trying to connect ESP to network.
If it fails reconnect to AP to try again

STEP 5: On successful connection, the screen above will be displayed and wait for about 5 seconds for the fingerprint mode to be change to either Registration, Verification, Delete by Id or Delete all users mode.

STUDENT REGISTRATION

STAGE 1 – Fingerprint Device Enrollment

STEP 1: Place finger on the surface of the sensor to capture fingerprint data

STEP 2: Wait till device prompts to remove finger

STEP 3: Place same finger again

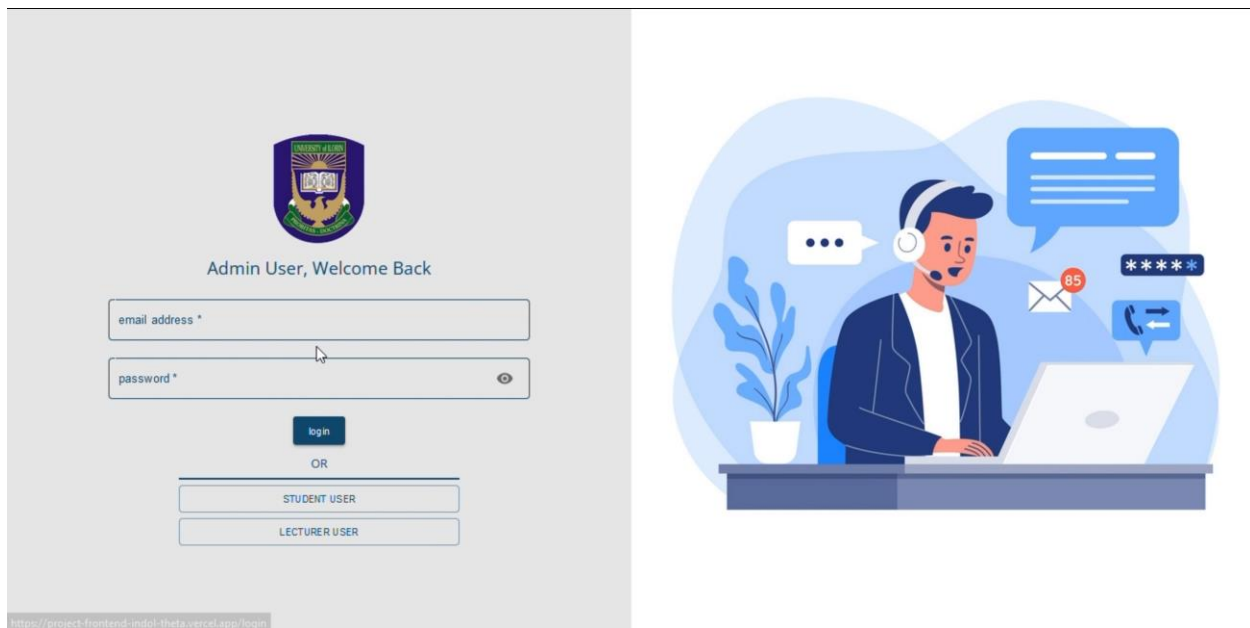

STEP 4: Registration Successful, click the yellow button on the device to register another user

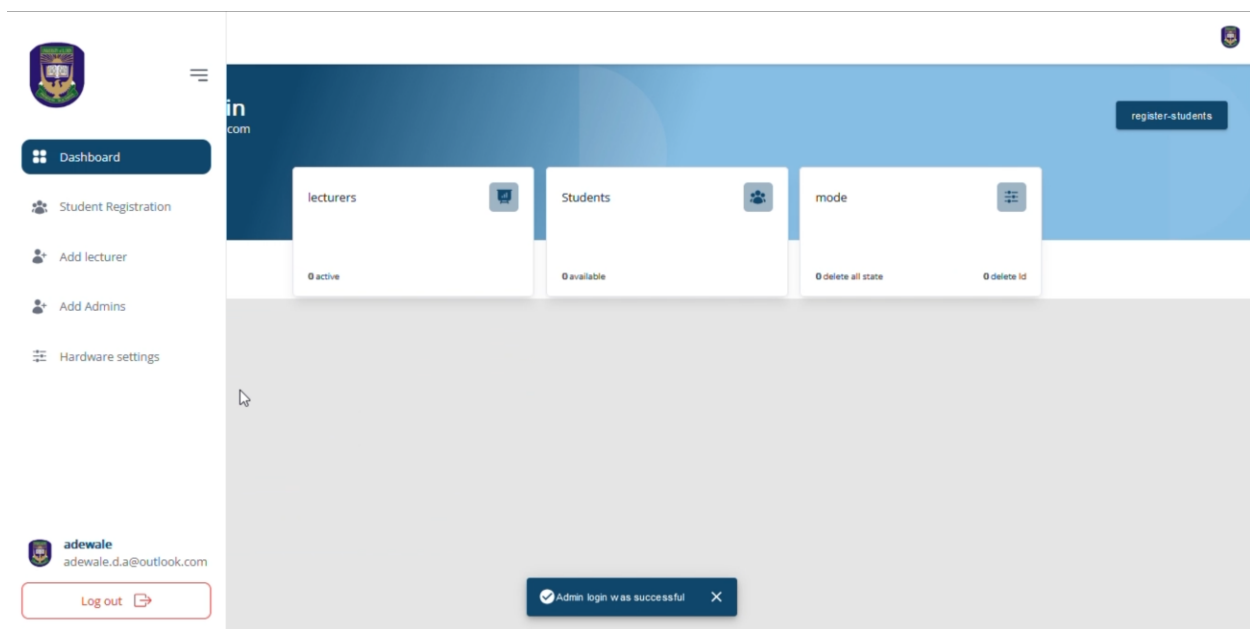

STAGE 2 – Admin Interface User Data Collection

STEP 1: Login with a valid admin credentials

STEP 2: Login with a valid admin credentials

STEP 3: Navigate to 'Student Registration' on the side bar menu, click 'fetch id' to auto populate registered user's ID and ensure it corresponds with the registered user's generated ID during the fingerprint data capturing. Proceed to fill the form fields with the corresponding registered user's details.

The screenshot shows a web application interface with a top navigation bar labeled 'Dashboard' and a sidebar with icons for home, users, and settings. The main content area contains a registration form with the following fields: 'Registration ID *' with a 'fetch id' button, 'First Name *', 'Last Name *', 'Matric Number *', 'email address *', 'username *', 'Fingerprint Index *' (a dropdown menu), 'Password *' with a toggle icon, and 'Confirm password *' with a toggle icon. A 'register' button is located at the bottom left of the form.

STEP 4: Click 'register' to save user's details

STUDENT VERIFICATION

STAGE 1 – Fingerprint device physical verification

STEP 1: Place a previously registered finger on the sensor and wait to get the matric number displayed on the screen if this user has been registered

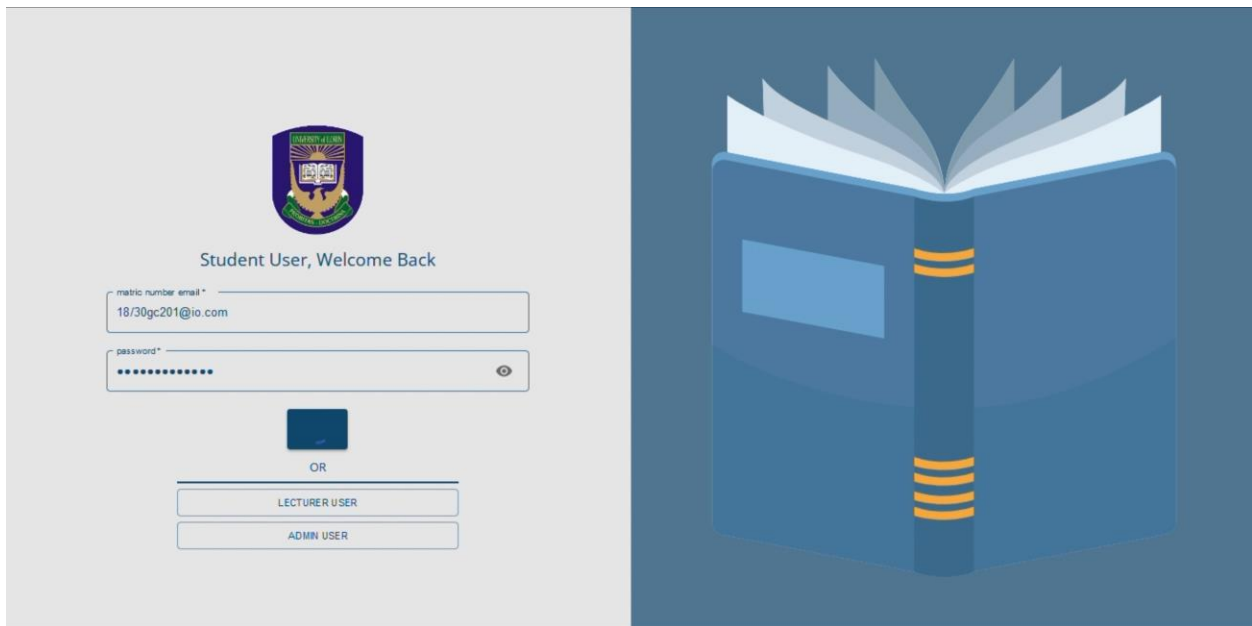

STEP 2: Click the yellow button to verify another user

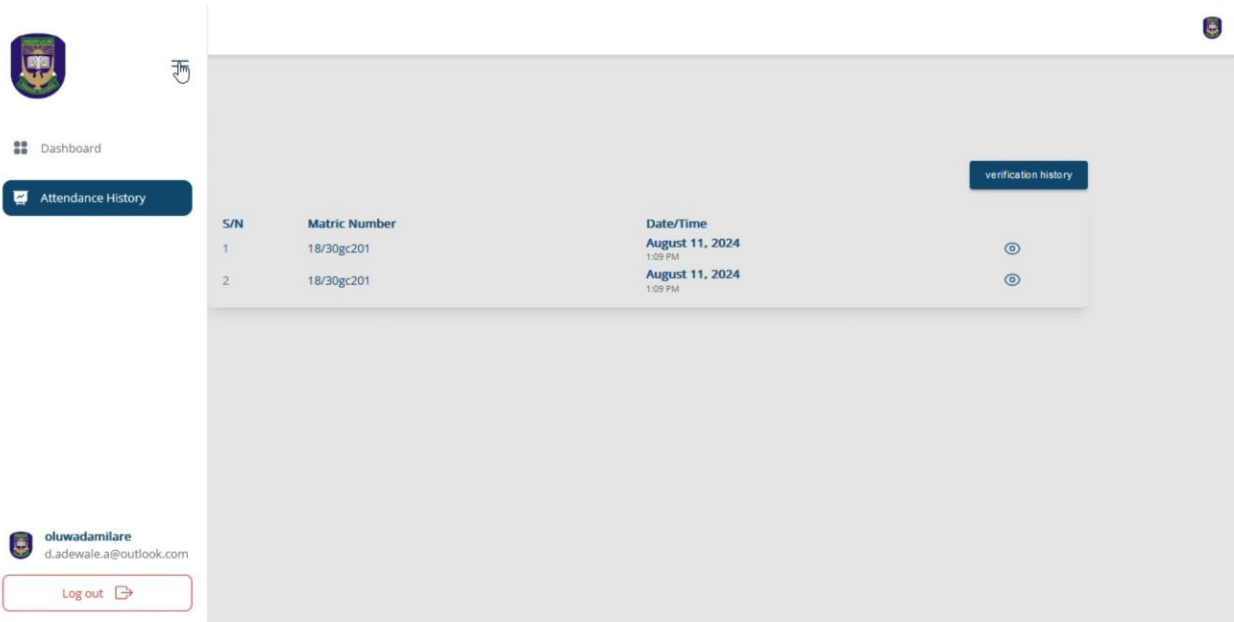

STAGE 2 – User account for confirmation of verification

STEP 1: Login with matric number in the form of `matric\_number@io.com` and password used in registration.

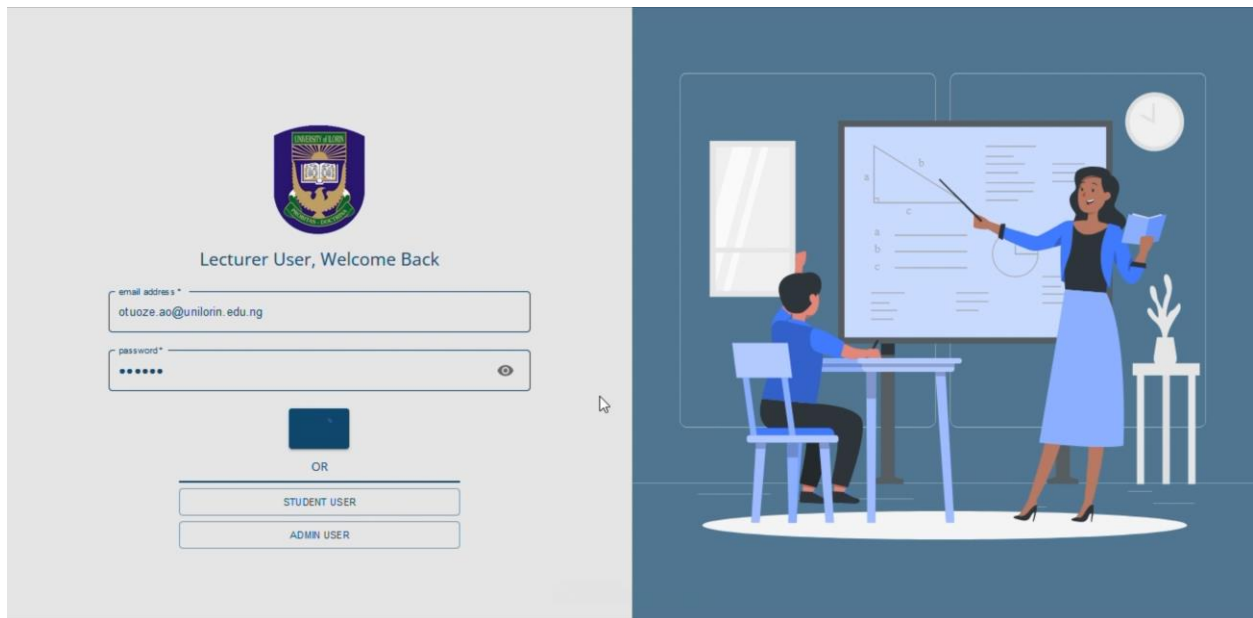

STEP 2: Navigate to 'Attendance History' to view history of attendance data of the authenticated user

LECTURER ATTENDANCE DATA MANAGEMENT

STEP 1: Login with a valid lecturer credentials

STEP 2: Navigate to 'Attendance History'
